C70 Gold System

Modern chamfered system

The C70 Gold chamfered system is a 5-chambered modern system, that's extruded using our lead-free PVCu Greenline compound. This system benefits from the cleaner lines of a modern chamfered suite of profiles for the design conscious.

The system is highly regarded as one of the easiest to fabricate and install and can be perfectly matched with a front/rear door, PremiLine patio door or a conservatory.

Kömmerring C70 GOLD specification:

- 70mm frame depth
- 5 chambered for better thermal performance
- Steel reinforced Profiles
- Slim sightlines with a lowline grey gasket
- Chamfered or ovolo glazing beads
- Wide range of colours - 44 woodgrain and coloured finishes
- High security multi-point locking & shoot bolts
- Internal beading for enhanced security
- High impact, colourfast and lead-free PVCu profiles that are better for the environment
